EDUCATION

Worcester Polytechnic Institute (WPI), Worcester, MA

BS+MS in Computer Science, Minor in ECE, GPA 3.93

MS Expected December 2026

Awards: Upsilon Pi Epsilon Honors Society, Dean's list Fall 2022 - Fall 2025

Relevant Coursework:

- Object-Oriented Design Concepts/Patterns
- Artificial Intelligence/Machine Learning
- Theoretical Computer Science
- Programming Language Implementation
- Algorithms
- Database Design
- Operating System Design
- Software Engineering

Skills

Primary Languages: Java, Python, C, C#, Racket, SQL, HTML, CSS, JavaScript/TypeScript

Auxiliary Languages: Scala, Rust, R, Haskell

Software/Frameworks - GitHub, React, AWS (Lambda, S3, API Gateway), Matlab, Microsoft Excel, Figma, Visual Studio, Eclipse, IntelliJ, Unity, KiCad

Projects

Restaurant Reservation App

November 2024 - December 2024

- Developed a full stack application where owners could create restaurants and users could make reservations saved in a database with AWS.
- Collaborated with teammates to divide work and write integrated code together.

Memory Management Unit

February 2024

- Designed a multi-process memory management unit in C.
- Implemented a page table to store memory for each process and switch them as required.

Dynamic Programming Code Generation

August 2025 - Present

- Worked with a Scala code generation framework to quickly implement fully coded solutions.
- Designed a model to represent Dynamic Programming problems and generalize families.

EXPERIENCE

Acend - Platforming Video Game Developer

December 2019 - April 2022

- Developed and launched a fully integrated 10 level platformer using Unity and C#
- Spearheaded all aspects of production, including coding, level architecture, and art design, resulting in a cohesive and polished final product.
- Garnered over 40,000 views on newgrounds.com

SummerTech - Purchase, NY - Lead Java Instructor

June 2022 - July 2025

- Taught students advanced programming concepts such as recursion, algorithms, and data structures in Java and Python.
- Mentored other teachers and helped them develop their programming and teaching skills.
- Coordinated staff members, created teacher pairings, solved technical issues, and evaluated staff performance.
